PRADEEP G

Cybersecurity Enthusiast | B.Tech Student | Aspiring Security Analyst

9025348451 | pradeepgobi8@gmail.com | LinkedIn | Portfolio

INTERNSHIP OBJECTIVE

Motivated cybersecurity student seeking an internship in penetration testing, network security, or SOC operations. I bring hands-on experience with VAPT tools, real-world CTF challenges (picoCTF, TryHackMe, Hack The Box), and AI-powered security project development. Eager to apply and expand my skills in a professional environment.

EDUCATION

Bachelor of Technology — Kongunadu College of Engineering and Technology

Year: 2023 – 2027 | CGPA: 7.8 | SSLC: 75.3%

TECHNICAL SKILLS

Core Competencies

Network Security	Ethical Hacking	VAPT	Linux CLI
Cybersec Fundamentals	UI/UX Design	Python	React / TypeScript

Security Tools

Burp Suite · Metasploit Framework · Nmap · Wireshark · John the Ripper · Maltego · Hydra

CERTIFICATIONS

- Ethical Hacker – Cisco (2026)
- Networking Fundamentals – TryHackMe (2026)
- Linux Fundamentals – TryHackMe (2026)
- Network Configuration and Initialization
- Endpoint Security
- Network Defense

PROJECTS

1. AI-Enabled Cyber Threat Detection & Reporting System | GitHub ↗

Designed and developed an AI-powered web application to streamline cybersecurity incident reporting and provide instant AI-assisted guidance, reducing response delays compared to traditional processes.

- Built with Python and ReactJS, secured using RSA encryption
- Detects phishing attempts, malware, and system vulnerabilities in real time

2. AI Web Analyzer | GitHub ↗

Built a scalable web application to analyze websites for security risks, fake content, and URL manipulation.

- Developed with TypeScript, Python, and MongoDB for efficient data processing
- Integrated Gemini API to detect fake websites, URL similarity, and security vulnerabilities

3. Password Strengthener | GitHub ↗

Created a tool to analyze password strength, detect vulnerabilities, and recommend secure password practices.

- Built with Python and Streamlit for a clean, user-friendly interface
- Integrated NumPy and Requests for data processing and secure API-based validation

EXPERIENCE & PRACTICE

CTF & Practical Cybersecurity

- Solved cybersecurity challenges on picoCTF, TryHackMe, and Hack The Box
- Gained practical experience in penetration testing and vulnerability assessment
- Hands-on work with Burp Suite, Metasploit, and Maltego in real attack-defense scenarios
